

Redefining Process Intelligence for the AI era

Create

Establish your operational foundation.

Process Core - a governed, living digital twin, with the richest meta-model in the market; unifying processes, roles, risk & controls, and business context into a single repository. Accelerated with AI and built on 30yrs of BPM expertise.

Process Core is the foundation of Intelligent Processes

Discover

Make the foundation dynamic.

Process Core is enriched with Process, Task and Agentic Mining to stop value leakage in your operations. Together, Core & Mining continuously monitor executed processes, uncover bottlenecks, simulate future-state scenarios, analyze agent behaviours and drive process improvements.

Monitoring, (Re)designing and simulating in one single repository

Transform

Drive AI-enabled transformation.

Transform operations with Agentic AI, bots and employees acting on a governed, dynamic foundation - executing faster and identifying new edge case opportunities to continuously refine your Process Core.

Trustable outcomes of AI agents
