
Hands-On Lab:

Create your first Analysis

Scenario

Create your first Analysis in ARIS Process Mining for your P2P Project

Lab Objectives

- Analysis Created.
- Create a Process Overview app and a Process Explorer App.

Steps

1. Create a new Analysis.
2. In your Analysis add a Process Overview App
 - a. Explore the app, see what happens when you click on the charts.
 - b. Apply a filter (e.g. last 12 months); What were the changes?
3. Now add a Process Explorer app
 - a. Check the legend
 - b. Increase the complexity (add more activities and connections)
 - c. Change the displayed information to throughput time.
 - i. What differences did you notice?
 - d. Explore the Variants tab
4. Create at least one selection of each type.
